## 5. Gallery -> public gallery

On public gallery page only, public status images are showing uploaded by all users. When you hover over images this red area that I marked is showing the image title that user inserted while uploading the image. On clicking each image such kind of enlarge gallery section will be shown. On this all images of public status are showing.

6. Gallery -> private gallery

On private gallery page only, private status images are showing uploaded by the current logged in user. When you hover over images it shows the colored version of the image and show the title of the image if any added by the user. On clicking each image such kind of enlarge gallery section will be shown. Here user can edit the image, add details or even delete the image by clicking on the 'X' mark.
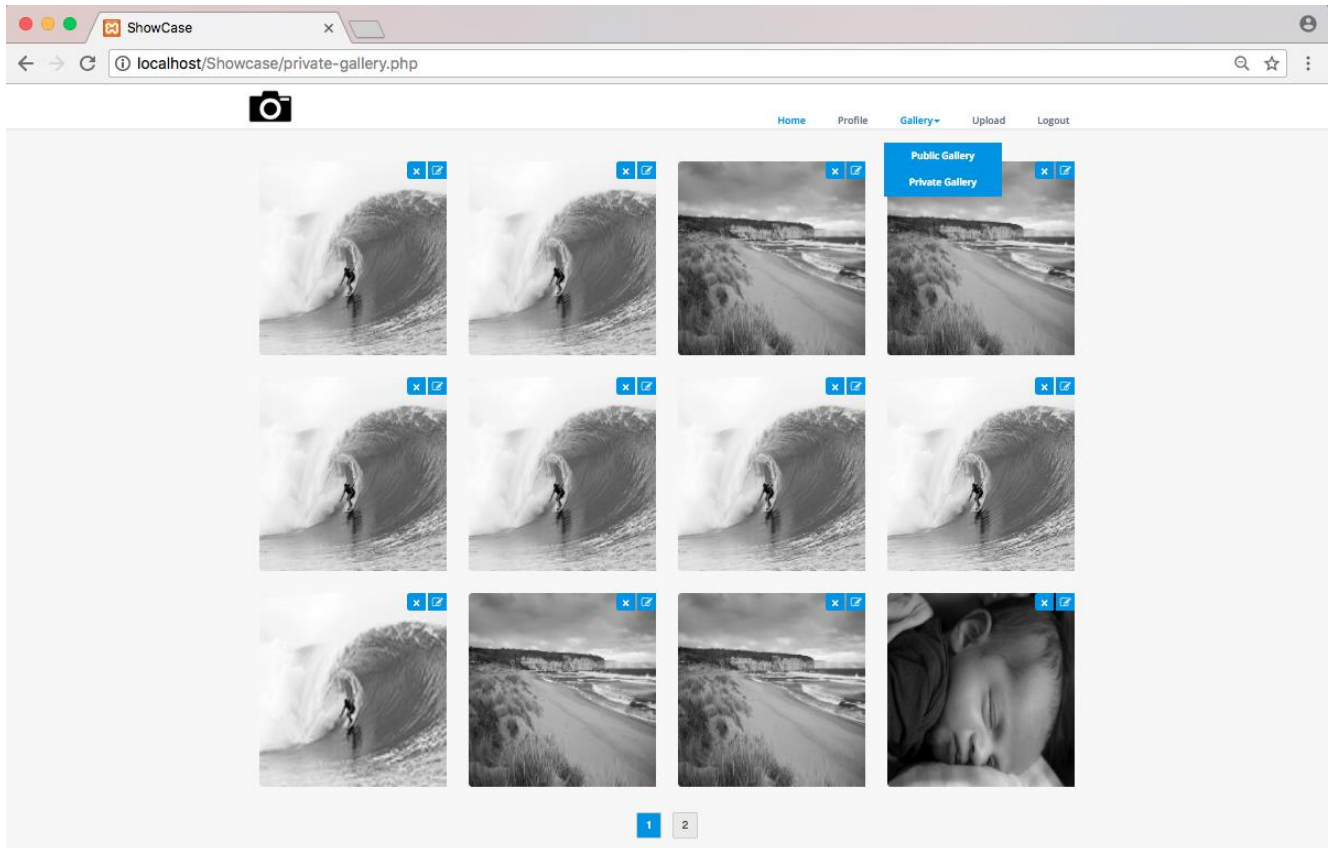

When you click on the 'X' mark on the image for deleting the following dialog will appear

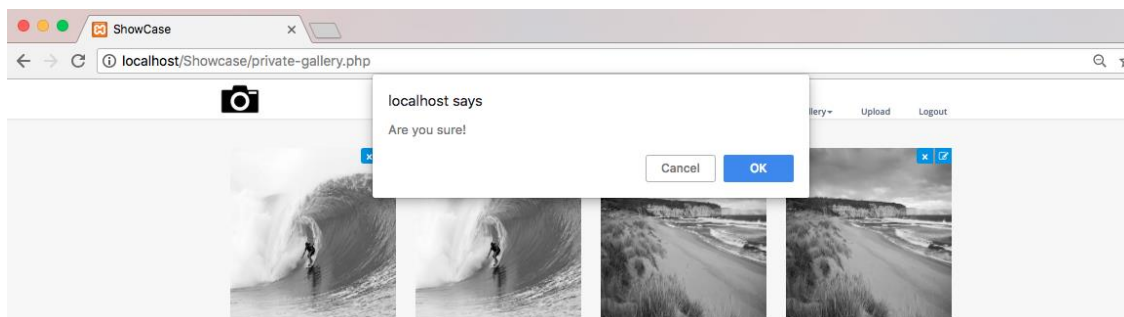

On clicking pen image user will be redirected to image edit section. Here you can change the status, name or upload another image instead of this.
